## Feeding Australians in Need

When you use a Sustain hot cup from the OzHarvest series, you are doing two important things for your community.

You are contributing to the circular economy – Sustain cups are renewable and compostable. So you're playing your part in a more sustainable future.

In purchasing cups from the OzHarvest series, you contribute to the fight against food waste. OzHarvest is committed to saving surplus food from landfill and redirecting it to those in need. Every carton of cups purchased will supply two meals to those who deserve it most.

Everybody deserves access to quality nutritious food.  
Make your coffee count! Help nourish Australia.

### Made from Renewable Sources

The Forest Stewardship Council® (FSC®-C117930) is a global, not-for-profit organisation dedicated to the promotion of responsible forest management. FSC® promotes environmentally appropriate, socially beneficial, and economically viable management of the world’s forests.

Look for our FSC®-certified products.

### Compostable in Industrial Facilities

Compostable products will breakdown into nutrient-rich organic matter which can be used as a fertiliser for plants.

These Sustain cups, along with their accompanying Pulp and PLA lids, are compostable in industrial facilities so will breakdown under specific conditions.

### Unique Water-Based Barrier Coating

Sustain Aqueous Cups have a unique water-based barrier coating that allows the cup to maintain its structural integrity when holding liquid and eliminates the need for a separate plastic or bio-plastic inner lining.

These cups have been rated “Recyclable” based on testing in accordance with PTS Method PTS-RH:021-97. Kerbside recyclability in Australia and New Zealand is pending APCO review. Check with your local council to confirm whether they can accept these cups for recycling.
