Sustain **OzHarvest Collection** Aqueous Hot Cups Feeding Australians in Need

When you use a Sustain aqueous hot cup from the OzHarvest Collection, you are doing two important things for your community.

These Sustain cups are made from renewable paper and are compostable in industrial facilities. So you're playing your part in contributing towards a more sustainable future.

By purchasing cups from the OzHarvest Collection, you contribute to the fight against food waste. OzHarvest is committed to saving surplus food from landfill and redirecting it to those in need. Every carton of cups purchased will supply two meals to those who need it most.

Everybody deserves access to quality nutritious food.

Made from Renewable Sources

Made from paper from well-managed, Forest Stewardship Council® (FSC®-C117930) certified forests and other controlled sources. FSC® promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests.

FSC® is a global, not-for-profit organization dedicated to the promotion of responsible forest management worldwide.

Compostable in Industrial Facilities

Compostable products will breakdown into nutrient-rich organic matter which can be used as a fertiliser for plants. The Sustain OzHarvest Collection Cups are compostable in industrial facilities, so will breakdown under specific conditions.

Unique Water-Based Barrier Coating

Sustain Aqueous Cups have a unique water-based barrier coating that allows the cup to maintain its structural integrity when holding liquid and eliminates the need for a separate plastic or bio-plastic inner lining.

These cups have been rated "Recyclable" based on testing in accordance with PTS Method PTS-RH:021-97. Kerbside recyclability in Australia and New Zealand is pending APCO review. Check with your local council to confirm whether they can accept these cups for recycling.
