HACCP International Certified

Katermaster Gloves are HACCP International certified meaning that they are suitable for use in facilities that operate in accordance with HACCP International based Food Safety Programme. This is an internationally recognised method of identifying and managing food safety risk.

NitraOne Gloves

Strength, Sensitivity & Stretch

Increased dexterity and tactility for precision tasks, plus superior when compared to vinyl alternatives.

Standard
Glove

Make an Impact on War on Waste

NitraOne

Compact Packaging

As NitreOne gloves are smaller than typical vinyl gloves, this means NitraOne packaging requires less storage space (ideal for galley and compact kitchens) and can assist in more efficient transport and delivery.

Reduce Waste

NitraOne gloves are lightweight yet strong, with greater elongation compared to standard Vinyl gloves. Elongation is the gloves ability to stretch and reform which can help reduce usage tears. This superior strength and lighter weight compared to standard gloves means, by weight, glove waste can be reduced by up to 45%.

NitraOne gloves bring multiple benefits to your business.

All comparisons made against standard vinyl gloves.
