REvhxc119	Revive HexCell rPET Tray	Clear	11 x 9"	CT/280

Innovative Liquid Retention Technology

Revive HexCell Trays are designed to capture and retain liquid in the cells at the base of the tray - helping to prevent leakage through the overwrap and eliminating the need for soaker pads.

Contains Recycled Content

Revive HexCell Trays are made using recycled materials rather than using only virgin material. Purchasing products made from recycled materials helps to support the recycling economy.

Widely Recyclable

Once rinsed thoroughly, Revive HexCell Trays can be disposed of in co-mingled recycling. This means they can be collected, sorted and recycled successfully in practice and at scale in Australia and New Zealand.
