

Think ahead.

## Safeguard care recipients and staff by ensuring a hygienic environment

**165,000 HAIs**

occur in Australian health facilities each year<sup>2</sup>

Up to **70%**  
of all healthcare-acquired infections are preventable<sup>1</sup>

**75%** of healthcare professionals agree that reducing unnecessary dispenser checks allows staff to concentrate on crucial tasks\*

### How Tork supports better hygiene for better care

- **Enhancing efficiency** by providing dispenser systems that reduce cost in use and minimise refilling tasks in hygiene critical environments
- **Improving hygiene** through no-touch dispensers, one-at-a-time dispensing, skin-friendly soaps and effective sanitisers, and **using data-driven** cleaning to keep cleaning staff out of controlled areas unless strictly necessary
- Enhancing the **patient experience** with hygiene solutions that are certified easy to use, designed for all users including children and the elderly, readily available, and help prevent infections
- **Helping staff to save time** with high-capacity and IoT connected dispensers means less time spent on unnecessary dispenser checks and refilling
